## PROJECTS:

### **Bank Financial App**

*Technologies: Python, SQLite, CSS, HTML, JavaScript*

- Currently developing a web-based application that allows users to manage their finances, track transactions, and view account balances. Integrates Python for the backend, SQLite for data storage, and HTML, CSS, and JavaScript for the front-end, providing a seamless user experience for financial management.

### **Cloud Infrastructure Migration and Security Hardening**

*Technologies: VMware Fusion, Microsoft Azure, Nessus, Linux, etc.*

- Managed the migration of three virtual machines — Kali Linux, Windows Server 2022, and Metasploitable — to a secure cloud environment on Microsoft Azure. This project gave me hands-on experience in risk assessment, OS hardening, and leveraging cloud tools to enhance operational efficiency.
